

# Not sure where to start with the NHS App?

**Get free help  
at a local library**

The **NHS App** is a simple and secure way to access a range of NHS services and information on your smartphone or tablet.

But we know that some people are not sure how to download it, make an account, access their GP record or do things like order a repeat prescription on it.

## That's why the **NHS** has teamed up with **local libraries** across Staffordshire and Stoke-on-Trent to help.

If you or a friend or family member need some support with using the NHS App, you can call or pop into a participating library to get the help and advice you need from trained staff.

Ask at your local library or visit [www.staffsstokeics.org.uk/nhs-app](http://www.staffsstokeics.org.uk/nhs-app) to find out which libraries you can go to for help.
