Dear

FOI-04-011-325

Your request for information under the Freedom of Information Act 2000

Thank you for your request for information received on the 5th April 2023. We can confirm that the Staffordshire and Stoke-on-Trent Integrated Care Board does hold some of the information that you have requested.

Please see our responses in blue below:

NICE have updated the guidance on the use of Continuous Glucose Monitoring (CGM) in Type 1 adults, children & young people and Type 2 adults. (NG17, NG18 & NG28) in March 2022. This guidance has been heavily championed by the NHSE clinical lead for diabetes.

This guidance now recommends much more widespread use of CGM devices in T1 & T2 diabetes.

Please can you tell me:

- As it has been nearly 12 months since this guidance was issued, what plans the ICS/ ICB have to implement this updated guidance in to a policy and what timescales you are working to?**

We are working collaboratively with partners across Staffordshire and Stoke-on-Trent and with other areas across the Midlands in relation of this updated guidance. Further information will be released when available in due course, with any changes to the local guidelines expected later in 2003.

- What reasons can you give for not implementing this guidance so far and is NHSE aware of the reasons for the delay?**

While NICE guidelines are not statutory (unlike Technology Appraisals), it is important that the Staffordshire and Stoke-on-Trent Integrated Care Board considers their guidelines, their application, and affordability, to support equitable and cost-effective use alongside completing priorities and opportunities. NHSE are aware of this and we are keeping them informed of our plans.

- **If you are not willing to implement the NICE recommendations in full in the next 3 months why would this be?**

As we have stated above, we are working with partners in relation to implementation of this updated guidance to consider the guidelines and all their implications and this may take longer to complete than three months. We would politely ask you to bear with us whilst we complete this process.

- **If your policy has been updated recently please can you forward a copy as part of your response?**

Please see responses above.

People living with T1 & T2 diabetes in Staffordshire are experiencing inequalities in access to this technology as neighbouring areas such Derby are now offering it in line with NICE. If the ICS response is unsatisfactory I shall be writing to the NHS England Clinical Lead for Diabetes, Healthwatch, Diabetes UK, my local MP and our local press.

Right of Appeal

Should you require any further information or clarification regarding this response please do not hesitate to contact us. If you are dissatisfied with the response, you are entitled to request an internal review which should be formally requested in writing and must be within two calendar months from the date this response was issued.

To request an internal review

You can request an internal review by contacting the Staffordshire and Stoke-on-Trent Integrated Care Board FOI team by emailing the team at StaffsStokeFOI@staffsstoke.icb.nhs.uk or by post to the address at the top of this letter.

If you are not content with the outcome of your internal review, you may apply directly to the Information Commissioner's Office (ICO) for a decision. Generally, the ICO cannot make a decision unless you have exhausted the Staffordshire and Stoke-on-Trent Integrated Care Board's FOI complaints procedure.

The ICO can be contacted at:
Information Commissioner's Office
Wycliffe House
Water Lane
Wilmslow
Cheshire
