

# Asthma Friendly Schools Programme

**The Asthma Friendly Schools Programme** brings together NHS, schools and Local Authorities to manage children and young people with asthma at primary and secondary schools. By completing the Asthma Friendly Schools Programme, you can ensure children and young people with asthma are safe within an asthma friendly environment.

## Why become an Asthma Friendly School?

- Increased confidence among school staff in asthma management
- Improved quality of life for children with asthma in school
- Reduced absences due to asthma
- Improved partnership working between schools and the NHS

**Through training and the adoption of asthma focused policies and procedures, becoming an Asthma Friendly School will ensure:**

- Your school has an asthma policy in place
- You have a register of children with asthma
- A care plan for each child with asthma
- Emergency inhaler kits in school
- Whole staff training

To register on the programme, please contact [asthmafriendlyschools@staffsstoke.icb.nhs.uk](mailto:asthmafriendlyschools@staffsstoke.icb.nhs.uk)

**Together we can work to reduce harm and improve the quality of life for children and young people.**

**I really enjoyed the programme** as it gave insight as to what's required in school to track Asthma, report use of inhalers and absences relating to Asthma. I feel more confident in being able to support children further.

**Excellent project** which has helped to improve our provision in school.

It was a **very thorough** programme.
